Project Experience

Personal Blogging App | *Java, Spring Boot, React, PostgreSQL*

In Progress

- Allowed users to manage blog posts according to a permission system.
- Created SQL schemas to describe relationships between many entities.
- Implemented a custom authentication system with refreshable JWTs.
- Developed the web app using NextJS with designs made in Figma.

Portfolio Website | *TypeScript, Firebase, React*

June 2021

- Developed forms and admin protected pages to handle dynamic content creation on the website.
- Stylized UI with custom SCSS and React components.
- Utilized Firebase Firestore, Storage, and Auth to power the website.
- Architected the website to be zero cost with Vercel deployment, Firebase database, and Formspree.

Url Shortener and Tracker | *TypeScript, Express, React, PostgreSQL*

January 2020

- Implemented an Http RPC API alongside a web app.
- Developed routes to shorten Urls with custom names.
- Server features native authentication and registration.
- Tracks url visits to display on a graph for each shortened url.

Work Experience

Vons

March 2021 – Present
